Question:	What were the strongest qualities of the course?
Response Rate:	83.33% (5 of 6)

1	We had a fair amount of points in the class which made it easier to keep our grades up if we happened to not do so well on an assignment. Class discussions were done very well and we were always given enough time in advance to get the assignments done.
2	The course allowed me to understand how this country has progressed from the use of social media and the advancement of technology.
3	The class was very informing and thought provoking. All expectations were very clear to students.
4	I find that the hands-on activities were eye-opening and worthwhile. Also, class discussions were great because it allowed for fluidity. In other words, the professor or a fellow classmate could change your perspective on social media, how people thrive as networked individuals, and whether technology is (at times)

	beneficial or not.
5	Being able to complete the assignments and hand them in on time

Question:	What suggestions would you offer the instructor to improve the course?
Response Rate:	50.00% (3 of 6)

1	This class was great! If anything, I would switch up the article days. They weren't bad by any means, I would just suggest trying something new for more in-depth discussion on those days. Maybe offering questions on Tignet that students can answer and use while explaining their article? Just a thought!
2	I really don't have any suggestions
3	Class was done very well. Only thing would be to keep up on the grades. Just so we have a general idea of where our grade sits. Its hard to determine when you there are grades still not put in from weeks prior.

Question:	What suggestions would you offer the instructor to improve the course?
Response Rate:	66.67% (6 of 9)
1	Nothing! I really loved this class!
2	different textbook as it got repetitive but other than that, he did a great job with this course
3	None he was great and got the point across to us.
4	The book was my least favorite part of the class. Professor Herges was able create great discussion from the book but maybe its time to look into different material.
5	I don't have many complaints. The only thing I could think of would be to add in another type of activity besides articles on Fridays. Maybe like a free-for-all type of assignment where we try to find something really interesting on the web and bring it to class.
6	Keep up the good work.

Question:	What were the strongest qualities of the course?
Response Rate:	80.00% (8 of 10)
1	I enjoyed the interactive nature of the course. Interacting with not only the instructor, but other students every single time we had class was so beneficial. It was always well-organized and the routine in what and when assignments were due made it easier to get through.
2	This class and its content is so dynamic that the discussions and content felt very fluid. That fits this class very well and Kyle was able to let us lead the discussions and reflections.
3	all the discussions we had in class
4	The way the teacher kept discussion going so good. Even when the students weren't talking the teacher still had something to talk about.
5	The open discussions we had in class on the daily! You learn to look at of peoples point of view rather than just your own.
6	Being able to interact about the different areas in Social media and other kinds of ICT's that are available to us.
7	Then communication in the class between each other was good.

8 Interesting

Question:	What suggestions would you offer the instructor to improve the course?
Response Rate:	60.00% (6 of 10)
1	It was my favorite course thus far, but sometimes the material got redundant, but that's just the course, I think.
2	Number 23 is particularly accurate to this class, Kyle's teaching style and the content and delivery method. Require online discussions to be completed early in the week and responses at the time now. This would allow for more full conversations for a wider variety of personal schedules.
3	maybe have the discussions, articles, and papers due every other week instead of every week
4	I think we should only do articles every other week. It got kind of boring listening to everyone's summary of their article every single Friday.
5	To not let one person take over the whole discussion!
6	I don't think I have any.

1	youre doing a good job.

4	none
5	I can't think of any improvements that need to be made in this course. But from what I have learned in this class, I think DWU should offer a course specifically in learning the basics on how to use social networking sites such as Facebook, Twitter, or blogging. Maybe offer a advanced LinkedIn techniques course to help us improve our professional profiles for potential employers. I think that we could integrate that into the Learn Strong courses, making them more beneficial to us in our graduating requirements. I think it will help students be able to find jobs quicker post graduation.
